

To Our Existing Medicare Patients

Please be advised that it is Medicare's guidelines to pay for an annual exam and Pap smear every two years. If you have exhausted your benefits before that two years and choose to have an annual exam, you are subject to pay for services rendered on that day. The Medicare Waiver/**Advance Beneficiary Notice** (ABN) form lists the items or services that Medicare isn't expected to pay for, an estimate of the costs for the items and services, and the reasons why Medicare may not pay. The ABN gives you information to make an informed choice about whether or not to get items or services, understanding that you may have to accept responsibility for payment. If you have any further questions please let us know.
